Leveraging AI for Effective Decision-
Making

Angelo Kwak

AI Data Engineer at Data Society Group

Greater Scranton Area

Summary

I'm passionate about turning data into meaningful insights and harnessing the power of AI to make a difference. My journey in Data Science and AI is all about curiosity, continuous learning, and finding creative solutions to everyday challenges using both data and advanced AI techniques. I love diving into datasets, uncovering hidden patterns, and leveraging smart algorithms to solve problems and bring ideas to life. Whether it's refining models or brainstorming new AI-driven approaches, I'm always eager to grow and help drive positive change.

Experience

Data Society Group

AI Data Engineer

February 2026 - Present (8 months)

Washington, DC

- Contributed to the development and maintenance of cloud-based data ingestion pipelines and API-driven web applications supporting federal government contract deliverables.

Blue Mountain

5 years 8 months

AI Engineer

October 2024 - February 2026 (1 year 5 months)

United States

- Designed and delivered enterprise AI and agentic systems, including LLM-powered copilots built using Model Context Protocol (MCP) and retrieval-augmented generation (RAG).
- Implemented API-driven and web-based AI applications to securely expose AI capabilities to enterprise users in regulated life-sciences environments.
- Integrated Azure AI services, vector search and semantic models to

enable context-aware, compliant AI workflows.

- Collaborated with product, engineering, and quality teams to translate complex technical and regulatory requirements into intuitive, production-ready AI solutions.

Data Engineer I

July 2023 - October 2024 (1 year 4 months)

State College, PA

- Developed company's first enterprise "big data analytics" solution, enabling large-scale analytics beyond traditional reporting workloads.
- Designed and implemented a dimensional data warehouse using star schema architecture, including fact tables, dimensions, and slowly changing dimensions.
- Partnered with internal teams to translate business requirements into performant data solutions and internal tools.

Report Developer II / BI & BA

December 2021 - July 2023 (1 year 8 months)

State College, PA

- Worked directly with customers in GxP-regulated industries to gather, clarify, and document BI and reporting requirements.
- Designed and delivered audit-ready dashboards and semantic models using SQL and DAX to support decision making in regulated environments.

Report Developer I / BI & BA

July 2020 - December 2021 (1 year 6 months)

State College, Pennsylvania, United States

Blue Mountain

Software Testing Intern

May 2019 - August 2019 (4 months)

State College, Pennsylvania

- Designed and reviewed several automated software test scripts and documentation for software that is critical to federally-regulated Life Science companies
- Assisted in creating new company procedures to design and execute automated test scripts that will be integrated into the company's overall testing program

- Collaborated with members of all company departments to assist in the application development process and gained knowledge from senior level developers and managers
- Worked as a team member of an agile development environment required to comply with rigorous software quality assurance

Kwak Law Firm

Technology Administrator

June 2015 - August 2018 (3 years 3 months)

Wilkes Barre, Pennsylvania

Family owned law firm. Standard tasks included:

- Maintain office systems and technology
- Diagnose/repair hardware and software issues
- Design and maintain advertisements and other marketing tools
- Web design and maintenance.
- Client file/data management
- Brief preparation
- Filing standard Workers' Compensation and Social Security Disability documentation

Education

Penn State University

Bachelor of Science - BS, Data Science · (August 2016 - May 2020)

Dallas High School

· (2012 - 2016)
